

BREVA

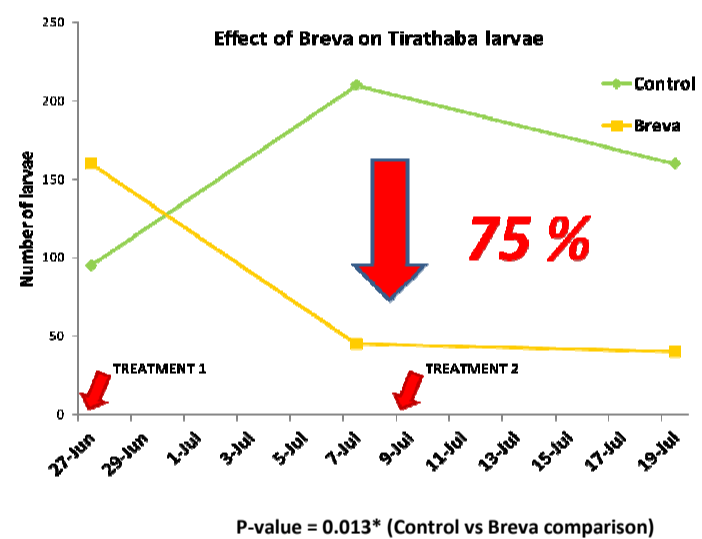

**BIOPESTICIDE
FOR
OIL PALM PLANTATIONS**

BioPesticide for the management of Bagworms & Tirathaba Larvae

Brevia is able to control the Tirathaba larvae in the fresh fruit bunch of the oil palms. Spray volume : 1,2 L/hectare (16 L every 5 oil palms). Dosage : 25 mL/10 L water. Two treatments done in the morning of June 27th and July 9th. Survival of larvae assessment done 10 days after treatment. Trials by B Cube Enviro Sdn. Bhd., 2013. Kuala Igan, Sarawak.

Compared to control, Brevia significantly reduces bagworms population, reducing the number of larvae per frond below the critical threshold of 10 after two treatments. Dosage : 25 mL/10 L water. Survival of larvae assessment done 5 days after treatment. Trials by B Cube Enviro Sdn. Bhd., 2013. Bukit Cloh.

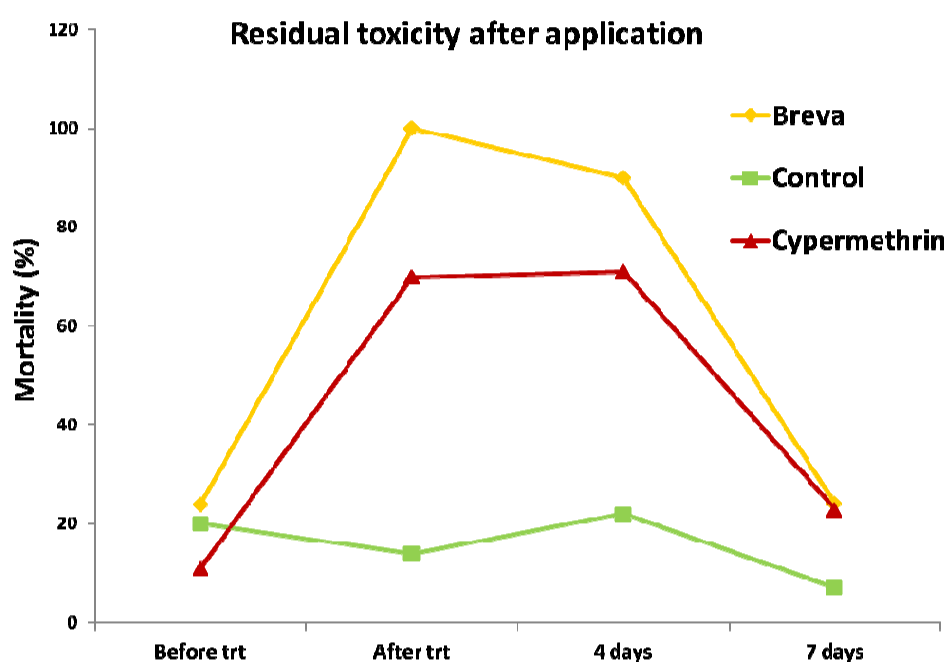

Brevia effectively reduces Bagworms and Tirathaba larvae

Breva has a high resistance to UV degradation

BREVA

Breva presents a good persistence of its efficacy with a very high % of mortality after four days and even 7 days compared to the control, demonstrating its high resistance to UV ray degradation. Experimental land applications of Breva against cruciferous pest. Trial by AEF Global, Québec, Canada. 2001.

Active ingredient : Btk (*Bacillus thuringiensis ssp. Kurstaki*)

Formulation type : Suspension concentrate

Restricted Entry Interval : 4 hours

Pre-harvest Interval : 0 days

Dosage:

Per 10 Litres water : 25 mL

Per hectare : 1.2 Litres

Spray volume : 480 L/ha

Recommendations for optimal results

- Dilute in 480 liters of water for each hectare. The leaves on which the larvae feed must be completely covered (upper and lower leaf surfaces)
- It is recommended to use a spray nozzle with hollow cone
- Spraying should be made during the early instar stage of larvae
- Repeat the treatment as needed at 3-7 day-intervals
- Spraying during hot weather (especially noon) can reduce the effectiveness of the product.
- If further treatments needs to be repeated, alternate BREVA with an insecticide from a different group and a different mode of action
