MODE OF ACTION

FungOUT has antifungal effects on conidia and ascospores germination, germ tube formation and elongation, appressorium formation, hyphae branching and haustorium formation. In addition, it has a direct bactericide activity and also reduces bacterial growth and the appearance of various disease symptoms.

USE PATTERN

CROP	DISEASE	RATE	FOLIAR SPRAY VOLUME	APPLICATION TIMING
Apple	Powdery mildew (<i>Podosphaera leucotricha</i> , <i>Podosphaera clandestina</i>)	1.2% v/v	Use the minimum spray volume to obtain full coverage (e.g. 50 - 80 gpa)	Apply when conditions are conducive to disease development

RESULTS

- Trial conducted by Kerix Cox in Geneva (New York), in a research orchard in 2017. Variety Gingergold. Comparative treatments stages were: tight cluster, pink, bloom, petal fall, first summer spray.

FungOUT has not been registered by the United States Environmental Protection Agency. AEF Global Inc. represents that this product qualifies for exemption from registration under the Federal Insecticide, Fungicide and Rodenticide Act. Please refer to product label for complete application details.
